

Southwest Cass County Water System – Water Distribution System to Unincorporated Areas of Southwest Cass County

This project entails developing a new distribution system in the SW corner of Cass County. Along with the new pipelines, we must also add a pump station and a water tower. We have the land purchased for the water tower site now. Because of problems with getting signup for this area, we are now in the process of re-evaluating the service area. We are currently canvassing the area for prospective new customers. This will hopefully be done the first quarter of 2012 with design to occur after that. Total cost of this project is estimated at \$7,216,700 with approximately 270 new services to be installed.
